

NIKHIL KUMAR GUPTA

JUNIOR SOFTWARE PROGRAMMER | AUTOMATION & REAL-TIME SYSTEMS

Jharkhand, India | +91 7903892879 | nikhilkumarguptankg0657@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack .NET Developer with 3+ years of experience in **Automation domain at Tata Steel**. Specialized in real-time industrial systems, PLC/OPC data integration, and scalable web applications using C#, ASP.NET, and SQL. Strong focus on performance optimization and system reliability, currently expanding into modern architecture with ASP.NET Core Web API.

TECHNICAL SKILLS

Backend:

- C#, ASP.NET, ASP.NET Core, Web API, ADO.NET, EF Core, JWT Authentication, LINQ

Frontend:

- JavaScript, jQuery, AJAX, HTML5, CSS3, Bootstrap

Database:

- SQL Server, Oracle

Tools:

- Web Form, MVC, WCF, IIS, Git, Azure App Service

Automation:

- PLC, OPC Integration, Real-time Systems

EDUCATION

B.Sc. Mathematics (Hons.)

Kolhan University (2022)

STRENGTHS

- Strong debugging and problem-solving skills
- Experience in real-time industrial systems
- Quick learner with adaptability to new technologies
- Focused on clean and optimized code

LANGUAGES

- Hindi
- English

CERTIFICATIONS

Certified Full Stack Developer

EXPERIENCE

JUNIOR SOFTWARE PROGRAMMER

(Nov 2023 – Present)

Napasoft (Client: Tata Steel), Jamshedpur

- Developed and maintained **real-time industrial applications** for automation systems using **ASP.NET, C#, and SQL**
- Integrated **PLC/OPC-based data pipelines** to process real-time sensor data
- Built dynamic UI using **JavaScript, AJAX, SVG, and Canvas** for live system visualization
- Improved system performance through **query optimization and efficient data handling**
- Collaborated with cross-functional teams to deliver **scalable and reliable industrial solutions**

FULL STACK DEVELOPER - INTERN

(Jan 2023 – Aug 2023)

Napasoft, Jamshedpur

- Developed **billing and inventory management system** using WinForms and ASP.NET MVC
- Gained hands-on experience in **full software development lifecycle**

KEY PROJECTS

BLAST FURNACE MONITORING SYSTEM (TATA STEEL)

- Developed a real-time monitoring system for furnace parameters (temperature, pressure, levels)
- Implemented 3-tier architecture (DAL, WCF, UI)
- Integrated real-time updates using AJAX polling
- Built dashboards using CanvasJS and Highcharts
- Designed SVG-based UI for plant visualization

LADLE TRACKING SYSTEM (TATA STEEL)

- Designed and developed real-time tracking system for ladles and cranes
- Built interactive plant layout using SVG with dynamic positioning
- Implemented live tracking without page reload using AJAX
- Developed dashboards and analytics for operational insights

PLC SENSOR DATA PROCESSOR (TATA STEEL)

- Processed real-time sensor data from PLC via OPC server
- Implemented data validation and mapping of OPC tags
- Ensured continuous data flow with robust error handling

PERSONAL PORTFOLIO (MODERN STACK)

- Developed portfolio using ASP.NET Core MVC and EF Core
- Implemented CRUD operations and responsive UI
- Deployed on AWS
